PROFESSIONAL SUMMARY

Software Engineering student (CGPA 3.85/4.00) with hands-on experience building full-stack web and mobile apps using Flutter, React.js, Node.js, Laravel, and Python for machine learning. Published an app on Google Play Store, deployed live web apps on Railway, and built ML tools with Streamlit reaching up to 87% accuracy. Looking for a Software Development Intern role to work on real projects and keep growing as an engineer.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React.js, Responsive Web Design

Backend: Node.js, Express.js, Laravel, PHP, REST APIs

Mobile: Flutter, Dart

Machine Learning: Python, Scikit-learn, Pandas, NumPy, Streamlit

Databases: MySQL, MongoDB, SQLite, Firebase Firestore

Tools & Concepts: Git, GitHub, Firebase Auth, Provider (State Mgmt), OOP, DSA

EDUCATION

Bachelor of Science in Software Engineering

Expected 2027

COMSATS University Islamabad, Wah Campus

6th Semester | CGPA: 3.85 / 4.00

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Software Quality Engineering, Software Construction & Development, Linear Algebra, Design & Analysis of Algorithms

PROJECTS

Watchify Store — Full Stack E-Commerce Platform

[Live Demo](#) | [GitHub](#)

Laravel, MySQL, PHP, HTML5, CSS3, JavaScript, REST APIs | Deployed on Railway

Early – Mid 2025

- Built a full online store with product listings, a shopping cart, and an admin dashboard (3 core modules) using Laravel and MySQL.
- Designed a clean database with 5+ linked tables and REST API routes for products, users, and orders, then deployed it live on Railway.

Carpool App — Flutter Firebase Ride-Sharing Platform

[GitHub](#)

Flutter, Dart, Firebase Auth, Firestore, Google Maps API, Provider

Mid 2025 – Dec 2025

- Built a ride-sharing app with separate driver and passenger views — drivers post rides, and passengers search and book them in real time.
- Used Firebase for secure login and live data updates, plus Google Maps for picking pickup and drop-off points on the map.

Heart Disease Predictor — ML Classification Pipeline

[Live Demo](#) | [GitHub](#)

Python, Scikit-learn, Pandas, Flask, Streamlit | Deployed on Streamlit Cloud

Mid 2025

- Trained and compared 4 ML models on patient data, reaching about 87% accuracy with Gradient Boosting as the best performer.
- Built a simple Streamlit web app where users enter health details and instantly see their predicted risk level.

Pocket Journal — Offline-First Mobile App

[Play Store](#) | [GitHub](#)

Flutter, Dart, SQLite | Published on Google Play Store | 10+ downloads

Early 2026 – Jun 2026

- Built an offline diary app with SQLite storage and full add, edit, and delete features, now at 10+ downloads on Google Play.
- Handled the entire release — app design, signing, build, Play Store submission, and privacy policy setup.

Ashiyana e Jannat — Islamic Habit Tracker

[GitHub](#)

Flutter, Dart, shared_preferences, ValueNotifier

Jun 2026

- Built an Islamic habit tracker for 5 daily prayers, Quran reading, and good deeds, with instant sync across all screens.
- Added a calendar history view and 7-day progress charts to track consistency over time.

CERTIFICATIONS

Full Stack Web Development — Apna College

Completed · 2024

Covered: HTML5, CSS3, JavaScript, React.js, Node.js, REST APIs
